ABOUT ALGIMED TECHNO

ALGIMED TECHNO is a company that develops advanced solutions in the field of biotechnology. We are a resident of the **HI-TECH PARK, MINSK CITY TECHNOPARK**, and the **MSU VOROBYOVY GORY SCIENCE AND TECHNOLOGY CENTER**.

We design and manufacture reagents, test systems, consumables, and equipment for medicine, pharmaceuticals, science, forensics, veterinary medicine, as well as the food and agricultural industries.

Our team is constantly evolving, and our strong scientific expertise allows us to create innovative products that meet the current demands of the market.

FOUNDING OF ALGIMED

The first company of the ALGIMED Group was registered. Activities began with the supply of laboratory equipment, reagents, and consumables, as well as service and training for labs in pharma, diagnostics, biology, forensics, veterinary, and food safety.

STRATEGIC PARTNERSHIPS

Signed distribution agreements with leading global brands, including Acros Organics, NEB, Qiagen, Bio-Rad Life Science, Beckman Coulter, Lonza, BIOO Scientific, and others.

LABORATORY ESTABLISHMENT

A testing and production laboratory was established for the evaluation and validation of ELISA kits.

FOUNDING OF ALGIMED TECHNO

A biotechnology company was founded, specializing in the development and production of reagents, test systems, consumables, and equipment for medicine, science, pharmaceuticals, and related industries.

ISO 9001:2015 CERTIFICATION

The company was certified to ISO 9001:2015, confirming its quality management system meets international standards.

ISO 13485:2016 CERTIFICATION

The company was certified to ISO 13485:2016, confirming compliance with international quality standards for medical device manufacturing.

INSTRUMENTATION ENGINEERING

The company launched instrumentation engineering to develop precise lab, medical, and industrial instruments.

ALGIMED TECHNO (RUSSIA)

The company expanded its presence by launching a production facility in Russia.

RESIDENT OF HIGH-TECH PARK

The company became a resident of the High-Tech Park in Republic of Belarus.

RESIDENT OF MSU VOROBYOVY GORY

The company became a resident of MSU VOROBYOVY GORY Innovation Center in Russia.

ISO 17025:2019 CERTIFICATION

The company received accreditation in accordance with the ISO 17025:2019 standard for its testing laboratory.

ISO 18385:2016 CERTIFICATION

The company was certified to ISO 18385:2016 – Forensic DNA Grade, an international standard that ensures the minimization of human DNA contamination in products used for forensic analysis.

RESIDENT OF MCT LLC

The company became a resident of the Minsk City Technopark.

SALES GEOGRAPHY

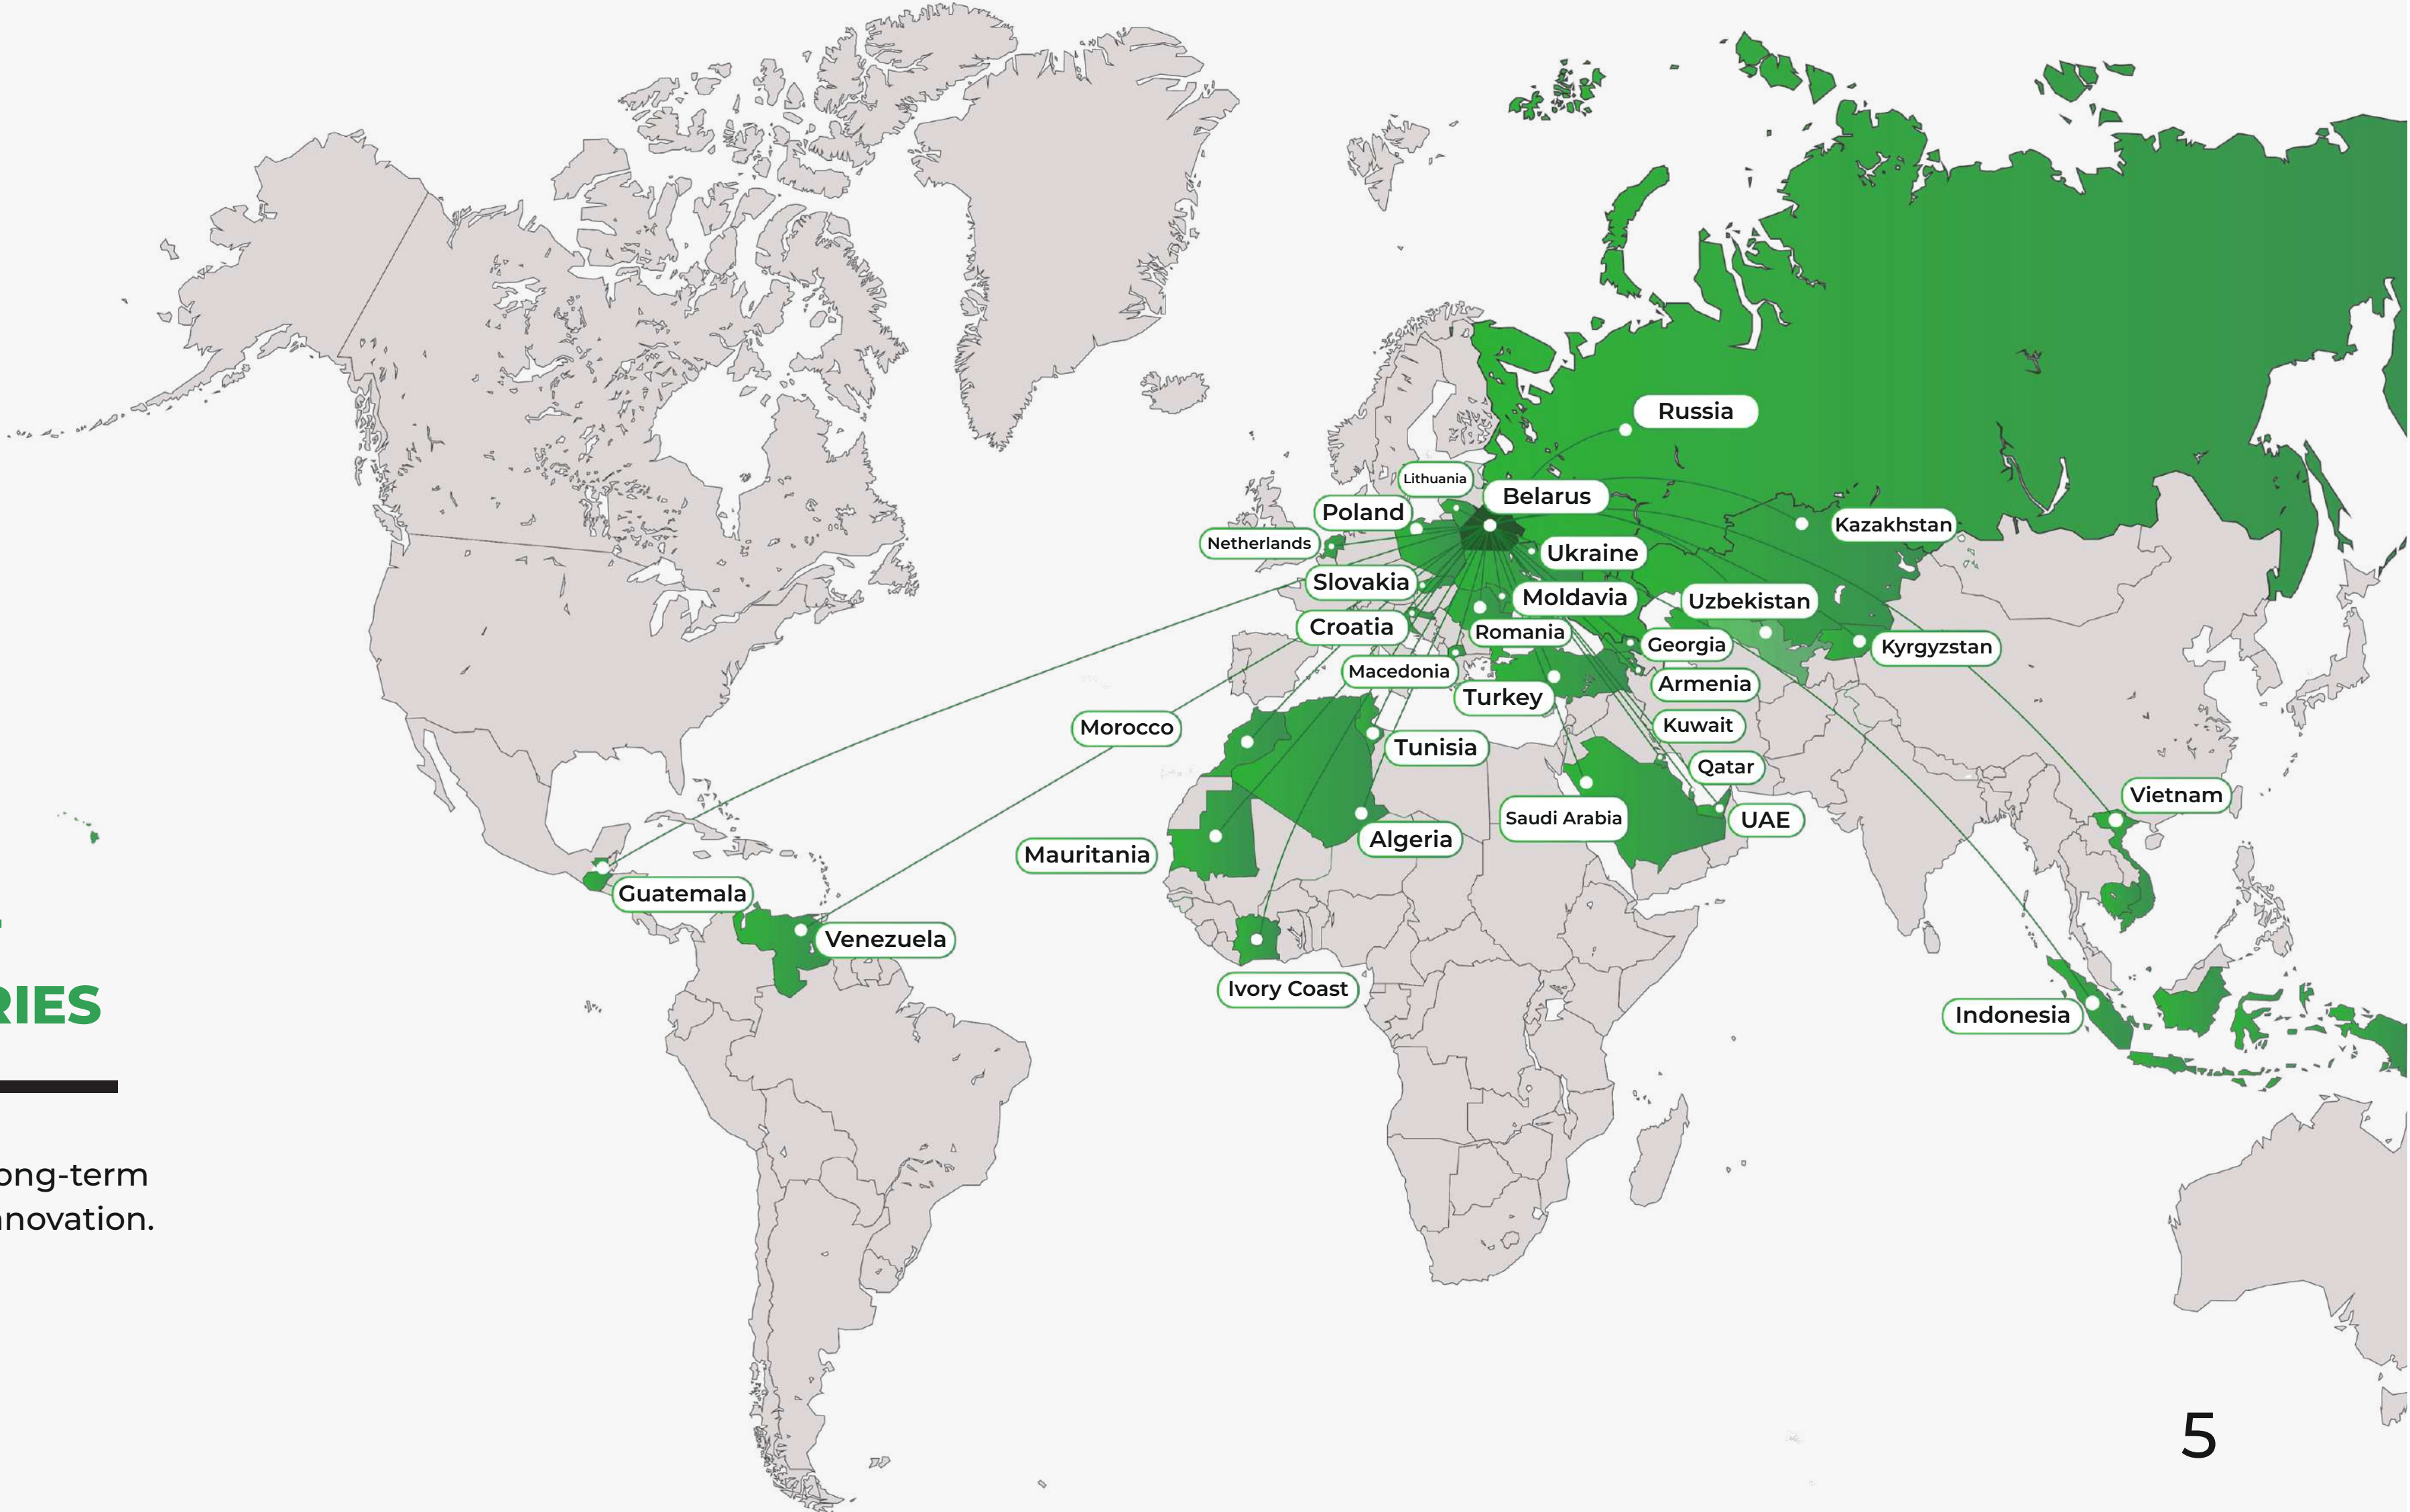

ALGIMED
TECHNO

4 CONTINENTS

ALGIMED TECHNO products are supplied across four continents, supporting science, medicine, and industry worldwide.

30+ EXPORT COUNTRIES

We deliver to over 30 countries, building long-term partnerships and contributing to global innovation.

ISO CERTIFICATIONS

The company holds **ISO 13485:2016** certification, recognized worldwide as the gold standard of quality in the medical manufacturing industry, and **ISO 9001:2015** certification, confirming the implementation and operation of a quality management system that ensures consistently high quality of products or services provided.

In 2023, the company received accreditation in accordance with the **ISO 17025:2019** standard for its testing laboratory.

ISO 18385:2016

To minimize the risk of contamination of products used for the collection, storage, and analysis of biological materials for forensic purposes and human DNA.

LLC «Algimed Techno» is the only company in the CIS that was recognized as meeting the requirements of **ISO 18385:2016 (January 2025)**.

KEY ADVANTAGES

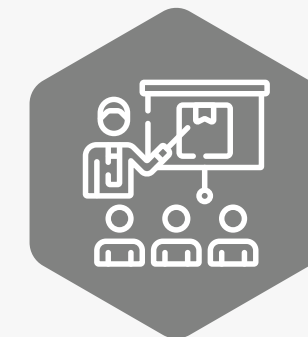

**In-house Research
& Development Department**

**In-house accredited
testing laboratory**

Extensive Product Portfolio

Training

Team of Experts

Streamlined Logistics

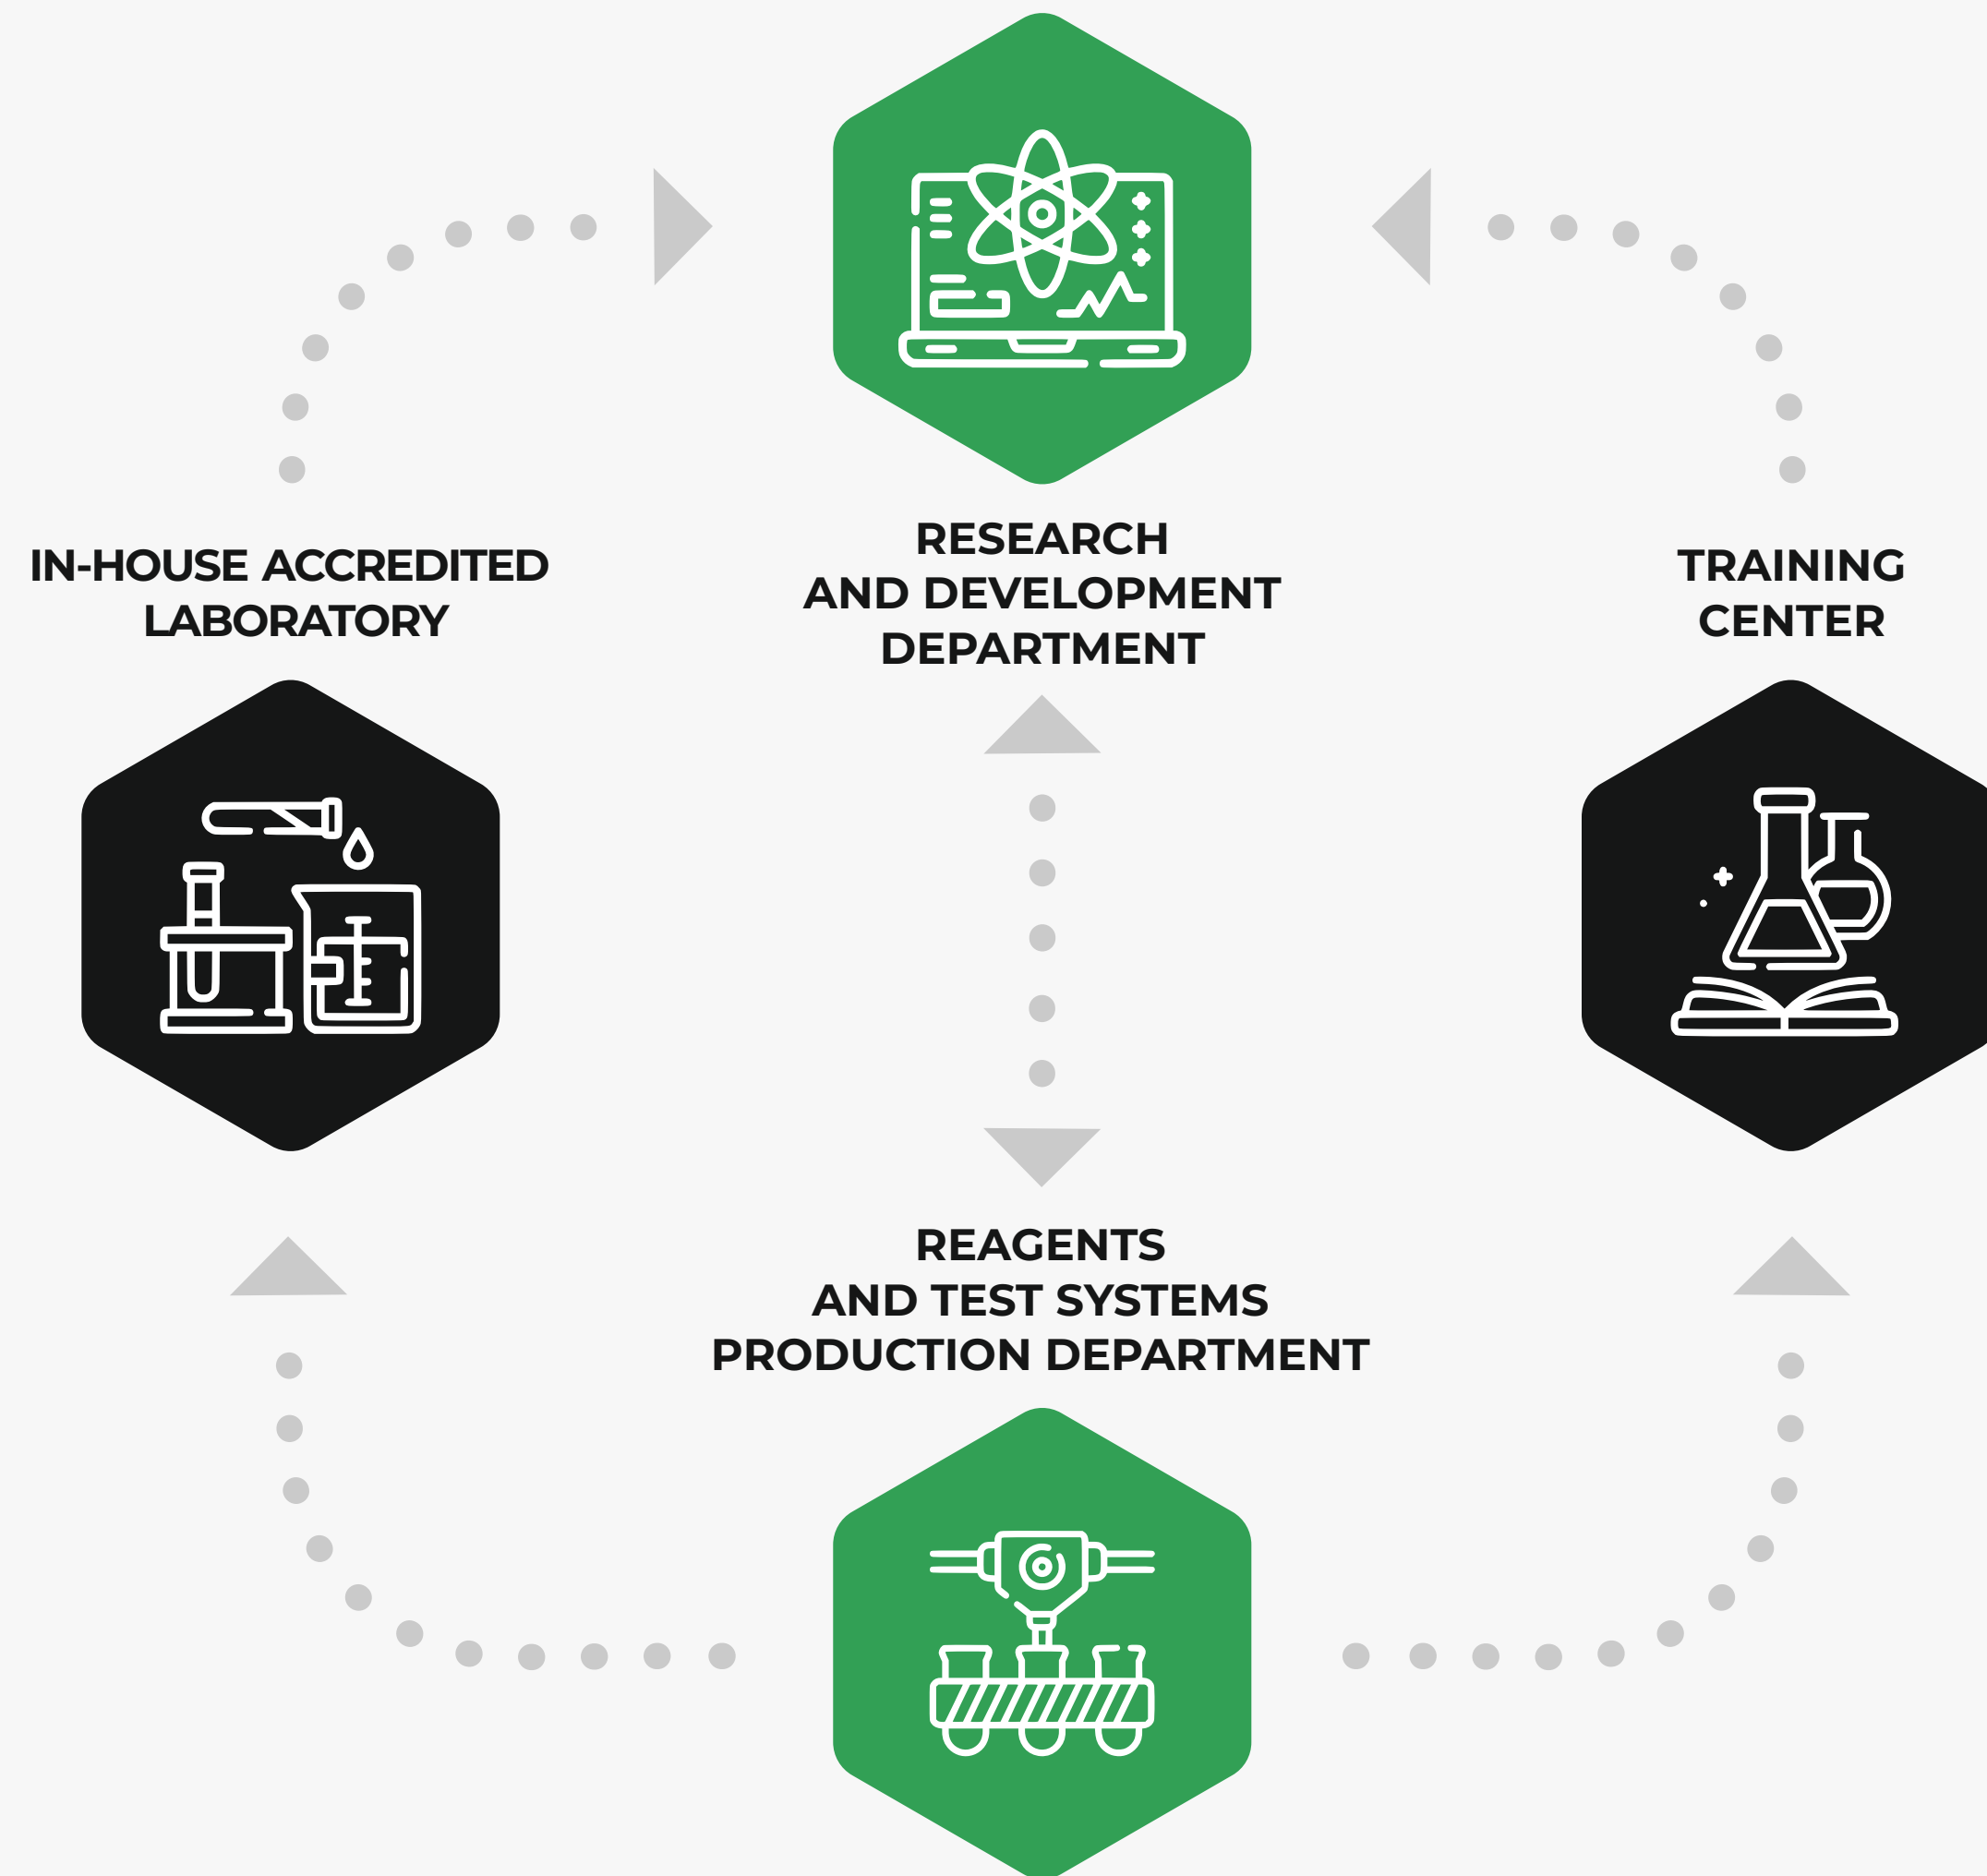

Service Support

Enduring Partnerships

FULL IN-HOUSE CYCLE

ALGIMED
TECHNO

From concept to launch — we develop, manufacture, and test all products in-house. This ensures speed, flexibility, and reliable quality.

Development

Idea generation, creation of a product prototype, evaluation of parameters and technical specifications, and preparation of documentation.

Production

Process optimization, scaling, preparation of production documentation, and product manufacturing.

Laboratory

Quality testing and validation of manufactured products.

Training

Comprehensive training — both practical and theoretical — for users of the new product.

ENGINEERING AND TECHNOLOGIES

ALGIMED
TECHNO

ALGIMED TECHNO develops and manufactures laboratory systems with proprietary software that ensures convenience, accuracy, and reliability. The use of domestic components guarantees high quality, stability, and independence at every stage — from development to operation.
